Questions:

1. Identify the following in program Knight1:
 - A variable declaration.
 - The statements in the procedure named setup().
 - A procedure call.

2. Identify the following in program Knight 2:

- An array declaration.
- A for-loop
- The statements that are executed each time the for-loop identified above is repeated.

3. Do the programs Knight 1 and Knight 2 do the same thing?

4. Describe what program Knight 1 does.
