CSCI 431: Programming Languages

Homework #5

Due 18 November, 1993

In the directory ~brock/431/progs there are programs written in both C++ and Ada to solve the exciting "CSCI" matching problem we discussed in class.

Your assignment is modify both the C++ and Ada programs to use a different representation for the abstract data type. I suggest using either an array of four characters or an integer. It's not that hard!

Upcoming attractions

Thursday, Nov 18, ADT modification due
Monday, 22 November, 4:00 pm MCNC room
   Barbara Liskov, MIT,
   "THOR: An object-Oriented Database System"
Tuesday, Nov 23, midterm number 2
Thursday, Dec 2, Ada concurrent program due
Monday, 6 December, 4:00 pm MCNC room
   Ken Kennedy, Rice University
   Architecture-Independent Parallel Programming Support in Fortran D
Thursday Dec 9, pthreads program due
Thursday, Dec 16, final exam
