Homework #3 (10 points)

Due, Wednesday, February 15

Problem 1 (2 points)

Problem 8 on page 59 of the text.

Problem 2 (3 points)

Do Problem 7 on page 89 of the text, *but* after answering the question for the System V system also answer it for the DG/UX system on `napoleon` using the information obtained in the on-line manual page for the `getdirentries` system call.

Problem 3 (5 points)

Do problem 6 on page 89 of the text; *however*, remember that you use the C-shell and not the Bourne shell and that the four Bourne shell commands:

```
for i in 1 2 3 4 5
do
echo hello > junk/$i
done
```
must be replaced with the three C-shell commands:
```
foreach i (1 2 3 4 5)
echo hello > junk/$i
end
```
By the way, don't get carried away – keep your answer to less than a page long.

Rules of engagement
Work with friends or enemies but write your answers in private.
