

A couple of things

Homework #7 (5 points)

Due, Friday, April 21

Many internet sites support an *UDP Based Echo Service*. According to Postel's RFC 862: "A server listens for UDP datagrams on UDP port 7. When a datagram is received, the data from it is sent back in an answering datagram."

Outline how you could write a program that would access the echo server on the machine `dopey.cs.unc.edu`. "Outline" means to list the system and library calls and their arguments. Half a page should be enough.

Carolina Course Review

Pardon my using one handout for two different purposes.

The course ID number for the Carolina Course Review is 0819001. Bring your completed reviews back to class on Wednesday or Friday. Please answer the following "optional questions."

22. Unix should be used in Comp 190.
23. Comp 190 should have lectures on the C programming language.
24. Computer networking should be covered in Comp 190.
25. This course will make it easier for me to find gainful employment.
26. Napoleon is a fine computer.
